

# Parata PASS™

## Patient Adherence Strip System

*The simple solution for worry-free  
med-pass packaging*

*"The most important goal is to get the right medicine to the right person at the right time in the right quantity."*

*"If you can complete that mission with a system that is time-efficient and frees staff to provide additional care, why wouldn't you make that decision?"*

*- Mitch Bunch,  
Wesley Haven Villas,  
Northwest Florida*

With all the change and uncertainty you're facing, it's good to know you've got at least one thing in the bag.

Short-cycle dispensing. Lower reimbursements. Fewer staff. More patients. Change seems to be the order of the day in senior care.

And while that's all happening around you, you still have an essential job to do in ensuring an efficient, consistent and safe med-pass.

What you need is a way to do more, and do it even better, with less. Fortunately, just such a solution is close at hand.

## Patient focused. *Staff friendly.*

The Parata PASS (Patient Adherence Strip System) offers a new, innovative approach to med-pass. Forget punch cards and messy carts. The time-consuming and labor-intensive distribution. The real risk of missing pills and medication errors.

Say hello to convenient, presorted deliveries, streamlined dispensing, and the security of pharmacy verification.

## The difference is clear.

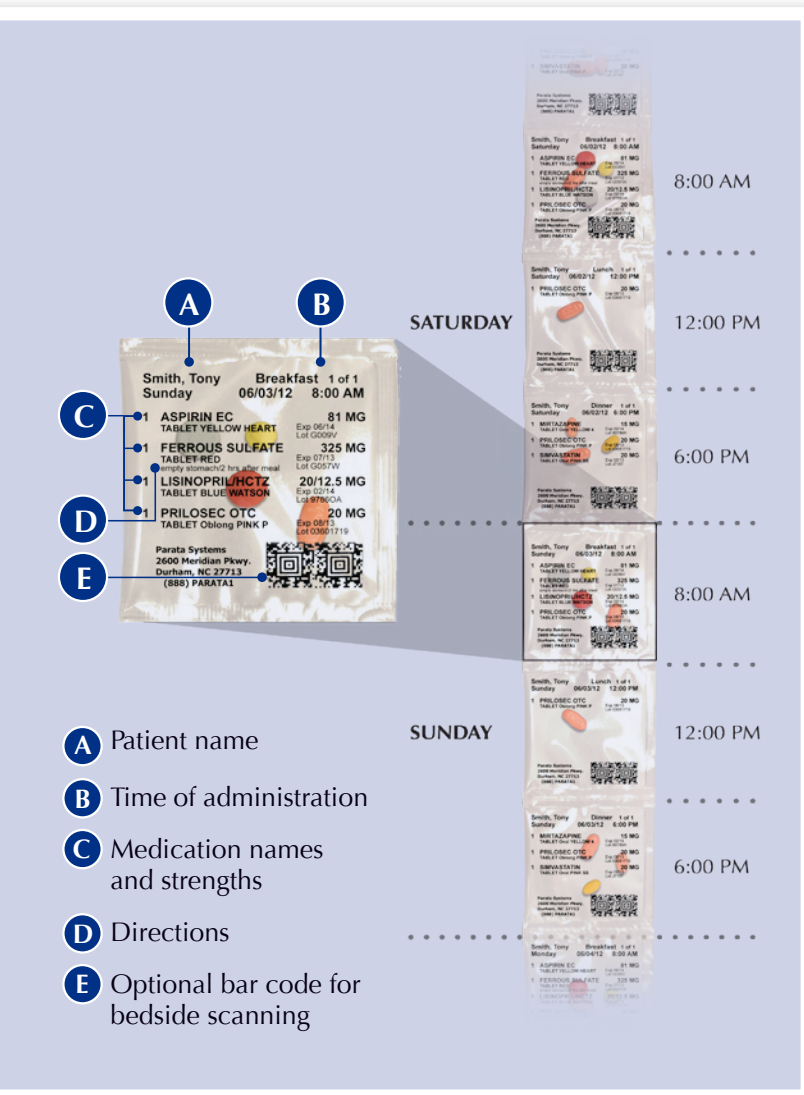

The benefits of Parata PASS are easy to see:

- **Consistent med-pass across nurse and shift changes**
- **Better inventory management**
- **Less medication and packaging waste**
- **Fewer medication errors**
- **Trouble-free use and administration**
- **Less time spent on med-pass**
- **More time for patient care**
- **Enhanced peace of mind for families**

This system is already being used in senior care communities nationwide. The result? Improved adherence and greater staff engagement – leading to measurably improved resident health.

## Here's how it works:

- Our pharmacy prepares, verifies and delivers your inventory.
- You receive sets of presorted strips, clearly labeled by patient, with important information about medications, strength, dosing instructions and more.
- Medications are neatly divided into PASS Packs, containing the appropriate meds for each med-pass dose.
- When it's time for med-pass, your nurse simply selects the PASS Pack, matches it to the MAR, and dispenses the meds for the patient, greatly reducing med-pass time.
- Parata PASS also reduces time to receive and process inventory, as well as storage requirements.
